HEMEROCALLIS *Daylilies

BOXWOOD GARDENS TRADE LIST

FALL 1942 - SPRING 1943

MRS. LEONARD HOWARD

P. O. Box 294

Greenville, South Carolina

GARDENERS generally are just beginning to realize the splendid part Hemerocallis can play in their plantings. They are in the class of Peonies and Iris, once established, they give years of satisfaction and pleasure in the garden picture. In midsummer, when there are so few perennials to be depended upon for a wealth of bloom, Daylilies are a mass of lovely color and in hot dry weather when gardeners are apt to neglect their plants they give a splendid account of themselves. These are very important perennials and should be in every up-to-date collection.

Our plants are unusually large in size, for we do not ship plants that are not large enough to bloom the following season. To be assured of bloom, plants must be WELL DEVELOPED and of TWO shoots. You will be pleased at the size of our plants and you can safely re-sell them for we sell, at wholesale, the same size plants used to fill our retail orders.

TERMS AND GUARANTEE

Our terms are Cash with Order, Check, Draft or Money Order, or if 25% of sale is enclosed we will ship C. O. D. Please do not send us orders for less than \$3.00 for we do not charge for packing and very small orders would be a loss to us.

Our plants are guaranteed to be healthy stock, true to name and to arrive in good condition.

Unless we are asked to ship at a later date, plants are shipped at once, weather permitting. We do not ship dry plants. Each order is freshly dug and shipped to you so as to arrive in healthy condition. We ship any season of the year that the ground is open—but Fall or Spring is the best time to plant.
